We will work with you and your child to create an individual care plan using the SHANARRI indicators: safe, healthy, achieving, nurtured, active, respected, responsible and included. The SHANARRI outcome indicators were developed for all children under the Scottish Government's GIRFEC (Getting It Right For Every Child) key policy initiative. The indicators are an important contribution toward your child reaching their full potential and are used to record and categorize observations, events and concerns. Filling the following information with your child will help us begin to create a plan.
